

Department of Artificial Intelligence and Machine Learning

Preamble:

An internship is a highly adaptable programme that's advantageous to both the hiring organisation and the intern. It is an organised academic prospect in which students can apply their academic knowledge and skills in the industry. Experiential education based on a set of goals for learning equips students for career requirements following graduation. The goals of the program are:

- To give students the opportunity to apply, assess, test, and incorporate academics skills and theoretical ideas in the workplace.
- To enable students to understand themselves, their abilities, goals, and professional interests by internship.
- To give students real-world experience with the disciplined and discriminatory use of evidence in making decisions and solving issues.

Academic Year: 2022-23

No. of students undergone internship: 57
