

BMS INSTITUTE OF TECHNOLOGY AND MANAGEMENT (Autonomous Institute affiliated to VTU, Belagavi, Approved by AICTE New Delhi) Yelahanka, Bengaluru 560064

Bachelor of Engineering

Department of Information Science and Engineering

III and IV Semester Scheme and Syllabus 2022 Scheme Effective from the AY 2024-25 Approved in the BoS meeting held on 02/09/2024

Vision and Mission of the Department

Vision

Emerge as center of learning in the field of Information Science & Engineering with technical competency to serve the society.

Mission

To provide excellent learning environment through balanced curriculum, best teaching methods, innovation, mentoring and industry institute interaction.

Program Educational Objectives (PEOs)

| PEOs | |
|------|---|
| PEO1 | Successful professional career in Computer Science & Technology. |
| PEO2 | Pursue higher studies and research for advancement of knowledge in IT industry. |
| PEO3 | Exhibit professionalism and teamwork with social concern. |

Program Specific Outcomes (PSOs)

| PSOs | |
|-------|--|
| PSO-1 | Apply the Knowledge of Computer technology to develop software solutions. |
| PSO-2 | Design and develop hardware systems, manage and monitor resources in the product life cycle. |

BMS Institute of Technology and Management (An Autonomous Institution, Affiliated to VTU Belagavi) Avalahalli, Doddaballapur Main Road, Bengaluru, Karnataka – 560064

CONTINUOUS INTERNAL EVALUATION (CIE) AND SEMESTER END EXAMINATION (SEE) PATTERN

(Applicable to UG students admitted from the 2022 batch, effective from the Academic year 2024-25 onwards)

The UG students admitted from the 2022 batch onwards are hereby informed to note the following regarding Continuous Internal Evaluation and Semester End Examination pattern:

- The Weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Examination (SEE) is 50%.
- The Minimum passing mark for the CIE is 40% of the Maximum marks (i.e. 20 marks out of 50) and for the SEE minimum passing mark is 35% of the Maximum marks (i.e. 18 out of 50 marks).
- A student will be declared to have passed the course if they secure a minimum of 40% (i.e. 40 marks out of 100) in the combined total of the CIE and SEE.

The following tables summarize the CIE and SEE Patterns for the courses of various credits:

| INT | EGRATED P ROF | | COMPET DR 3 CRE | | COURSE | (IPCC) COURSES |
|------------------------|--|-----------------------------------|--------------------|--|----------------------------------|--|
| Evalua | tion Type | Internal Assessme nts (IAs) | Marks | Marks to be scaled down to | Min. Marks to be Scored | Evaluation Details |
| | CIE - Internal Assessment (IA) Tests | CIE – Test 1 (1.5 hr) | 40 | 20 | | The sum of the two internal assessment tests will be 80 Marks |
| Theory | | CIE – Test 2 (1.5 hr) | 40 | | 1220 | and the same shall be scaled down to 20 Marks . |
| Component | CIE – CCA (Comprehens ive Continuous Assessment) | CCA | 10 | 10 | - | Any one assessment method can be used from the list appended below. |
| | Total CIE 1 | Theory | | 30 | 12 | |
| Practical Component | CIE - Practical | | 30 | 10 | H1 | Each laboratory experiment is to be |

Page 1 | 6

| | | the second | | | assessed for 30 Marks using appropriate rubrics. | | |
|---------|----------------------------|------------|-----|----|---|--|--|
| | CIE Practical Test | 20 | 10 | - | One test after all experiments to be conducted for 20 Marks | | |
| | Total CIE Practical | | 20 | 08 | | | |
| Total C | IE Theory + Practical | | 50 | 20 | | | |
| | SEE | 100 | 50 | 18 | SEE exam is a theory exam, conducted for 100 Marks , scored marks are scaled down to 50 Marks . | | |
| | CIE + SEE | | 100 | 40 | | | |

Note: The assessment of the laboratory component for the IPCC courses shall be restricted to CIE only.

| Evaluation Type | | Internal Assessments (IAs) | Test/ Exam Marks Condu cted for | Marks to be scaled down to | Min. Marks to be Scored | Evaluation Details |
|-----------------|---------------|----------------------------------|--|-------------------------------------|----------------------------------|--|
| | CIE – IA | CIE – Test 1 (1.5 hr) | 40 | 30 | | The sum of the two internal assessment tests will be 80 |
| Theory | Tests | CIE – Test 2 (1.5 hr) | 40 | | | Marks and the same will be scaled down to 30 Marks . |
| Component | CIE - CCAs | CCA | 20 | 20 | - | Any Two assessment methods can be used from the list. If it is project-based, one CCA shall be given. |
| | Total | CIE Theory | 1 | 50 | 20 | |
| | SEE | | 100 | 50 | 18 | SEE is a theory exam, conducted for 100 Marks , scored marks are scaled down to 50 Marks . |
| | CIE + SEI | | 100 | 40 | | |

| | | I 01 CREDIT – M | NON-IPCC | | STION TY | TPE | |
|---|-----------------|----------------------------------|---|----------------------------------|----------------------------------|--|--|
| Evaluati | ion Type | Internal Assessments (IAs) | Test/ Exam Marks Conduc ted for | Marks to be scaled down to | Min. Marks to be Scored | Evaluation Details | |
| | CIE – IA | CIE – Test 1 (1 hr) | 40 | | | The question paper pattern for this course shall be an MCQ of 1 or 2 Marks (s). The questions with 2 Marks can be framed | |
| Continu ous Internal Evaluati on Compon ent | Tests (MCQs) | CIE – Test 2 (1 hr) | 40 | 40 | | Marks can be frame based on a highe Bloom's level. The sum of the tw internal assessment tests will be 8 0 Marks , and the sam will be scaled down to 40 Marks . | |
| | CIE - CCAs | CCA | 10 | 10 | | Any One Assessment method can be used from the list provided below. | |
| | Total CIE | | | 50 | 20 | - | |
| SEE (МСQ Туре) | | | | 50 | 18 | The question paper pattern for this course shall be an MCQ of 1 or 2 Marks (s). The questions with 2 Marks can be framed based on higher Bloom's level. MCQ-type question papers of 50 | |
| | CIE + SI | EE | | 100 | 40 | questions with each question of a 01 Mark , the examination duration is 01 hour. | |

| | | 01 CREI | DIT | | |
|--------------------------------------|----------------------------------|---|--|----------------------------------|--|
| Evaluation Type | Internal Assessments (IAs) | Test/ Exam Marks Conduct ed for | Marks to be scaled down to | Min. Marks to be Scored | Evaluation Details |
| | CIE - Practical | 30 | 30 | 8 | Each laboratory experiment is to be evaluated for 30 Marks using appropriate rubrics. |
| Continuous Internal Evaluation | CIE - Practical Test | 50 | 20 | | One test after all experiments is to be conducted for 50 Marks and to be scaled down to 20 Marks . |
| | Total CIE | - | 50 | 20 | |

Learning Activities for CCAs:

A faculty member may choose the following CCAs based on the needs of the course:

- 1. Course project
- 2. Literature review
- 3. MOOC
- 4. Case studies
- 5. Tool exploration
- 6. GATE-based aptitude test
- 7. Open book tests
- 8. Industry integrated learning
- 9. Analysis of Industry / Technical / Business reports
- 10. Programming assignments with higher Bloom level
- 11. Group discussions
- 12. Industrial / Social / Rural projects

 Professional Core Course (IPCC): Refers to Professional Core Course Theory Integrated with practicals of the same course. Credit for IPCC can be 04 and its Teaching– Learning hours (L : T : P) can be considered as (3 : 0 : 2) or (2 : 2 : 2). The theory part of the IPCC shall be evaluated both by CIE and SEE. The practical part shall be evaluated by only CIE (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper. For more details, the regulation governing the Degree of Bachelor of Engineering /Technology (B.E./B.Tech.) 2022-23 may please be referred.

National Service Scheme /Physical Education/Yoga/Music/National Credit Corps: All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE)(Sports and Athletics), Yoga(YOG), Music and National Credit Corps (NCC) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, Yoga, Music and NCC activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

| To introduce the concept of random variables, probability distributions, specific discrete and continuous distributions with practical application in Computer Science Engineering and social life situations. To Provide the principles of statistical inferences and the basics of hypothesis testing with emphasis on some commonly encountered hypotheses. To find the association between attributes and the correlation between two variables. | | | |
| Teachers can use the following stravarious course outcomes. 1. In addition to the traditional l methods may be adopted so that t and applied Mathematical skills. 2. State the need for Mathematics v 3. Support and guide the students for for for for for for for for for for | ecture method, different ty he delivered lessons shall d vith Engineering Studies and | ypes of innovativ evelop students' | theoretical |

4. You will assign homework, grading assignments and quizzes, and

documenting students' progress.

5. Encourage the students to group learning to improve their creative and analytical skills.

6. Show short related video lectures in the following ways:

- Υ $\;$ As an introduction to new topics (pre-lecture activity).
- Υ $\,$ As a revision of topics (post-lecture activity).
- Υ As additional examples (post-lecture activity).
- Υ As an additional material of challenging topics (pre-and post-lecture activity).
- Υ $\,$ As a model solution of some exercises (post-lecture activity).

Module-1: Probability Distributions

Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Binomial, Poisson and normal distributions- problems (derivations for mean and standard deviation for Binomial and Poisson distributions only)-Illustrative examples. Exponential distribution.

(RBT Levels: L1, L2 and L3)

(12 Hours)

Module-2: Joint probability distribution & Markov Chain

Joint Probability distribution for two discrete random variables, expectation, covariance and correlation. Markov Chain: Introduction to Stochastic Process, Probability Vectors, Stochastic matrices, Regular stochastic matrices, Markov chains, Higher transition probabilities, Stationary distribution of Regular Markov chains and absorbing states.

(RBT Levels: L1, L2 and L3)

Module-3: Statistical Inference 1

Introduction, sampling distribution, standard error, testing of hypothesis, levels of significance, test of significances, confidence limits, simple sampling of attributes, test of significance for large samples, comparison of large samples. (12 Hours)

(RBT Levels: L1, L2 and L3)

Module-4: Statistical Inference 2

Sampling variables, Test of Significance for means of two small samples, students 't' distribution, Chi-square distribution as a test of goodness of fit. F-Distribution.

(RBT Levels: L1, L2 and L3)

Module-5: Curve fitting, Correlation, and Regressions

Principles of least squares, Curve fitting by the method of least squares in the form y = a+bx, y=a +bc+cx₂ and y=ax_b. Correlation, Coefficient of correlation, Lines of regression, Angle between regression lines, standard error of estimate, rank correlation. (RBT Levels: L1, L2 and L3) (12 Hours)

Course outcomes:

The students will be able to:

CO1: Apply discrete and continuous probability distributions in the engineering field.

CO2: Apply discrete-time Markov chains and n-step transition probabilities for transitions between states over time.

CO3: Employ statistical methodologies in the engineering problem.

CO4: Analyze statistical data using correlation and regression methods.

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- Υ For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
 - Υ The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered.
- Υ Any two assignment methods mentioned in the 220B2.4, if an assignment is projectbased then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.

(12 Hours)

(12 Hours)

 Υ For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course. Semester-End Examination:

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

- 1. The question paper will have ten questions. Each question is set for 20 marks.
- 2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
- 3. The students have to answer 5 full questions, selecting one full question from each module. Marks scored shall be proportionally reduced to 50 marks.

| Design Binary Adder-Subtractor – Half adder and Half Subtractor and simulate using | | | | |
| VHDL/Verilog HDL. | | | | |
| Design Decimal adder and simulate using VHDL/Verilog HDL. | | | | |
| Design Different types of multiplexer like 2:1, 4:1 and 8:1 and simulate using VHDL/Verilog | | | | |
| program. | | | | |
| Design and implement various types of De-Multiple er and simulate using VHDL/Verilog | | | | |
| Design and simulate VHDL/Verilog program for implementing various types of Flip-Flops | | | | |
| such as SR, JK and D. | | | | |
| | | | | |

Course outcomes (Course Skill Set):

At the end of the course, the student will be able to:

- CO1 : Illustrate the various techniques to solve the logic/Boolean expressions
- CO2: Experiment and simulate to realize the digital circuits.

CO3: Analyse the functionality of various devices in communicating with processor and I/O devices. CO4 : Demonstrate the various digital circuits using hardware or software tools.

Suggested Learning Resources:

TextBooks

Course Objectives:

This course will enable students to:

- 1. To Demonstrate the need for OS and different types of OS
- 2. To discuss suitable techniques for management of different resources
- 3. To demonstrate different APIs/Commands related to processor, memory, storage and file system management.

Preamble

Operating systems are the fundamental part of every computing device to run any type of software. The increasing use of computing devices in all areas of life (leisure, work), lead to a variety of operating systems. Yet all operating systems share common principles. These principles are important for computer science students in their understanding of programming languages and software built on top of the operating systems.

This course will be discussing about the Address spaces, System call interface, Process/Threads, Inter Process Communication, Deadlock, Scheduling, Main memory, Virtual memory and File systems.

Module – 1

Introduction to operating systems, System structures: What operating systems do; Computer System organization; Computer System architecture; Operating System structure; Operating System operations; Process management; Memory management; Storage management; Protection and Security; Distributed system; Special-purpose systems; Computing environments.

Operating System Services: User - Operating System interface; System calls; Types of system calls; System programs; Operating system design and implementation; Operating System structure; Virtual machines; Operating System debugging, Operating System generation; System boot.

Textbook 1: Chapter - 1 (1.1-1.12), 2 (2.2-2.11)

(8 Hours)

Module – 2

Process Management: Process concept; Process scheduling; Operations on processes; Inter process communication

Multi-threaded Programming: Overview; Multithreading models; Thread Libraries; Threading issues. **Process Scheduling:** Basic concepts; Scheduling Criteria; Scheduling Algorithms; Thread scheduling; Multiple-processor scheduling.

Textbook 1: Chapter - 3 (3.1-3.4), 4 (4.1-4.4), 5 (5.1 -5.5)

(8 Hours)

Module – 3

Process Synchronization: Synchronization: The critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization;
 Deadlocks: System model; Deadlock characterization; Methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock.

Textbook 1: Chapter - 6 (6.1-6.6), 7 (7.1 -7.7)

(8 Hours)

Module – 4

Memory Management: Memory management strategies: Background; Swapping; Contiguous memory allocation; Paging; Structure of page table; Segmentation.

Virtual Memory Management: Background; Demand paging; Copy-on-write; Page replacement; Allocation of frames; Thrashing.

Textbook 1: Chapter -8 (8.1-8.6), 9 (9.1-9.6)

(8 Hours)

Module – 5

File System, Implementation of File System: File system: File concept; Access methods; Directory and Disk structure; File system mounting; File sharing; Implementing File system: File system structure; File system implementation; Directory implementation; Allocation methods; Free space management. **Secondary Storage Structure, Protection:** Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; Protection: Goals of protection, Principles of protection, Domain of protection, Access matrix.

PRACTICAL COMPONENT OF IPCC

Recap/Summary of the Course

Textbook 1: Chapter - 10 (10.1-10.5) ,11 (11.1-11.5),12 (12.1-12.5), 14 (14.1-14.4)

(8 Hours)

| SI. No | Programs List |
|-----------|--|
| 1 | Basic Unix commands: who, ls, ln, cp, rm, mv, chmod, chown, mkdir, rmdir, pwd,cd and so on. |
| 2 | Write a C program to demonstrate open (), read (), write () and close () system call. |
| 3 | Create the following types of a files using shell command and system call a. soft link (symlink system call) b. hard link (link system call) |
| 4 | Write a C program to simulate Race condition. |
| 5 | Write a program to print the system resource limits. Use getrlimit system call. |
| 6 | a. Write a C program to demonstrate multitasking using fork () system call. b. Write a C program that illustrates how an orphan, zombie processes are created. |
| 7 | Write a program to make parent to wait for a specific child process and print the type of termination, if abnormal termination, print the signal number. |
| 8 | Write C programs that illustrate communication between two unrelated processes usingnamed pipe (Fl FO file). |
| 9 | Write a C program a. To create a message queue and b. To send message to a message queue by mentioning message id, message and message number Receive message from message queue by mentioning message id and message number. |

10 Write a program to create a semaphore and initialize value to the semaphore.

a. create a binary semaphore

b. create a counting semaphore

Course Outcomes:

The students will be able to:

CO 1: Describe the basics of the operating systems services, process, threads and communication.

CO 2: Apply appropriate scheduling methods for process execution and its management.

CO 3: Illustrate suitable methods to handle deadlocks and process synchronization.

CO 4: Analyze memory management techniques and its allocation policies.

CO 5: Discuss various Implementation of File systems, security mechanism with respect to different storage management technologies.

CO 6: Apply APIs related to Process, Files and IPC to develop operating system applications.

| Total Number of Contact Hours | 40 | Exam Hours | 3 |

Course Objectives:

This course will enable students to:

- 1. Explain fundamentals of data structures and their applications essential for programming/problem Solving.
- 2. Utilize an appropriate data structure like Stack, Queues, Lists, Trees and Graphs to solve a given problem.
- 3. Demonstrate sorting and searching algorithms.

Preamble: Data Structures are a specialized means of organizing and storing data in computers in such a way that we can perform operations on the stored data more efficiently. Data structures have a wide and diverse scope of usage across the fields of Computer Science and many other fields of Engineering. Data Structures are the main part of many computer science algorithms as they enable the programmers to handle the data in an efficient way. It plays a vital role in enhancing the performance of a software.

Module – 1

Introduction: Significance and scope of Data Structures, Data Structures and Algorithms in Economic growth of Nation, Impact of Data Structures and Algorithms on societal problems, sustainable solutions, Career perspective of Data Structures and Algorithms, current innovations in Data Structures.

Data Structures: Definition, Classification and Operations, Dynamic memory allocation, Dynamic Arrays, Self-referential structures.

Stacks: Definition, Stack Operations, Array Representation of Stacks, Stacks using Dynamic Arrays. **Stack Applications:** Polish notation, Infix to postfix conversion, evaluation of postfix expression, Multiple Stacks and Queues. Programming Examples.

Text Book: Chapter-1:1.2 Chapter-2: 2.1 to 2.7 Chapter-3: 3.1,3.2,3.6 Reference Book 1: 1.1 to 1.4

(8 Hours)

Queues: Definition, Array Representation, Queue Operations, C ircular Queues, Circular queues using Dynamic arrays, De-queues, Priority Queues. **Recursion:** Factorial, GCD, Fibonacci Sequence, Tower of Hano, Ackerman's fu

Text Book: Chapter-3: 3.3, 3.4, 3.7 Chapter-4: 4.1 to 4.4

Module - 3

Module – 2

Linked Lists: Definition, Representation of linked lists in Memory, Memory allocation; Garbage Collection.

Linked list operations: Traversing, Searching, Insertion, and Deletion. Doubly Linked lists, Circular linked lists, and header linked lists. Linked Stacks and Queues. Applications of Linked lists – Polynomials, Sparse matrix representation. Programming Examples.

Text Book: Chapter-4: 4.5,4.7,4.8 Chapter-5: 5.1 to 5.3, 5.5

Note - Students who have undergone "Basics of Java Programming-22CS36A" in first year are not eligible to opt this course

Course objectives:

- 1. To learn primitive constructs JAVA programming language.
- 2. To understand Object Oriented Programming Features of JAVA.
- 3. To gain knowledge on: packages, multithreaded programing and exceptions.

Preamble

The purpose of this course is to enable learners to solve problems by breaking it down to object level while designing software and to implement it using Java. This course covers Object Oriented Principles, Object Oriented Programming in Java, Inheritance, Exception handling, Event handling, multithreaded programming and working with window-based graphics. This course helps the learners to develop Desktop GUI Applications, Mobile applications, Enterprise Applications, Scientific Applications and Web based Applications.

Teaching-Learning Process (General Instructions)

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective

- 1. Use Online Java Compiler IDE: https://www.jdoodle.com/online-java-compiler/ or any other.
- 2. Demonstration of programing examples.
- 3. Chalk and board, power point presentations
- 4. Online material (Tutorials) and video lectures.

An Overview of Java: Object-Oriented Programming (Two Paradigms, Abstraction, The Three OOP Principles), Using Blocks of Code, Lexical Issues (Whitespace, Identifiers, Literals, Comments, Separators, The Java Keywords).

Data Types, Variables, and Arrays: The Primitive Types (Integers, Floating-Point Types, Characters, Booleans), Variables, Type Conversion and Casting, Automatic Type Promotion in Expressions, Arrays, Introducing Type Inference with Local Variables.

Operators: Arithmetic Operators, Relational Operators, Boolean Logical Operators, The Assignment Operator, The ? Operator, Operator Precedence, Using Parentheses.

Control Statements: Java's Selection Statements (if, The Traditional switch), Iteration Statements (while, do-while, for, The For-Each Version of the for Loop, Local Variable Type Inference in a for Loop, Nested Loops), Jump Statements (Using break, Using continue, return).

Text book 1: Chapter 2, 3, 4, 5

Module-2 Introducing Classes: Class Fundamentals, Declaring Objects, Assigning Object Reference Variables, Introducing Methods, Constructors, The this Keyword, Garbage Collection. Methods and Classes: Overloading Methods, Objects as Parameters, Argument Passing, Returning Objects, Recursion, Access Control, Understanding static, Introducing final Text book 1: Chapter 6, 7 (6 Hours) Module-3 Inheritance: Inheritance Basics, Using super, Creating a Multilevel Hierarchy, When Constructors Are Executed, Method Overriding, Dynamic Method Dispatch, Using Abstract Classes, Using final with Inheritance, Local Variable Type Inference and Inheritance, The Object Class. Interfaces: Interfaces, Default Interface Methods. Text book 1: Chapter 8, 9 (6 Hours) Module-4 Packages: Packages, Packages and Member Access, Importing Packages. **Exceptions:** Exception-Handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Java's Built-in Exceptions, Creating Your Own Exception Subclasses, Chained Exceptions. Text book 1: Chapter 9, 10 (5 Hours) Module-5 Multithreaded Programming: The Java Thread Model, The Main Thread, Creating a Thread, Creating Multiple Threads, Using is Alive() and join(), Thread Priorities, Synchronization, Inter thread Communication, Suspending, Resuming, and Stopping Threads, Obtaining a Thread's State. **Text book 1: Chapter 11** (6 Hours) **Course outcome (Course Skill Set)** At the end of the course, the student will be able to: CO1: Demonstrate the fundamentals of Java programming constructs. CO2: Apply the concepts of object oreiented features for ehnacing code reusability. CO3 : Illustarate the concept of packages and exception handling in solving complex problems. CO4: Apply concepts of multi-threading in program development.

CO5: Develop solutions for the given scenario using java concepts.

Module-1

(5 Hours)

Programming Experiments (Suggested and are not limited to)

- 1. Develop a JAVA program to add TWO matrices of suitable order N (The value of N should be read from command line arguments).
- 2. Develop a stack class to hold a maximum of 10 integers with suitable methods. Develop a JAVA main method to illustrate Stack operations.
- 3. Develop a JAVA program to create a class named shape. Create three sub classes namely: circle, triangle
- 4. and square, each class has two member functions named draw () and erase (). Demonstrate polymorphism concepts by developing suitable methods, defining member data and main program.
- 5. Develop a JAVA program to create an abstract class Shape with abstract methods calculate Area() and calculate Perimeter(). Create subclasses Circle and Triangle that extend the Shape class and implement the respective methods to calculate the area and perimeter of each shape.
- 6. Develop a JAVA program to create an interface Resizable with methods resize Width(int width) and resize Height(int height) that allow an object to be resized. Create a class Rectangle that implements the Resizable interface and implements the resize methods
- 7. Develop a JAVA program to raise a custom exception (user defined exception) for Division ByZero using try, catch, throw and finally.
- 8. Write a program to illustrate creation of threads using runnable class. (start method start each of the newly created thread. Inside the run method there is sleep() for suspend the thread for 500 milliseconds).
- 9. Develop a program to create a class My Thread in this class a constructor, call the base class constructor, using super and start the thread. The run method of the class starts after this. It can be observed that both main thread and created child thread are executed concurrently

Note - Students who have undergone " Introduction to C++ Programming BPLCK105D/205D" in first year are not eligible to opt this course

Course Objectives:

This course will enable students to:

- 1. To understand object-oriented programming using C++and Gain knowledge about the capability to store information together in an object.
- 2. To illustrate the capability of a class to rely upon another class and functions.
- 3. To Create and process data in files using file I/O functions
- 4. To understand the generic programming features of C++ including Exception handling

Preamble

Object oriented programming is an approach that provides a way of modularizing programs by creating partitioned memory area for both data and functions that can be used as templates for creating copies of such modules on demand. OOP is a base for learning Programming with the rapid changes in technology, there is an increasing need to keep the academia abreast of the skill set requirement of the industry. These concepts are important for computer science students in their understanding of programming languages. This course will be discussing Objects, Classes, Polymorphism, Encapsulation, data abstraction Inheritance etc.

Module – 1

An overview of C++: What is object-Oriented Programming? Introducing C++ Classes, The General Form of a C++ Program. Classes and Objects: Classes, Friend Functions, Friend Classes, Inline Functions, Parameterized Constructors, Static Class Members, When Constructors and Destructors are Executed, The Scope Resolution Operator, Passing Objects to functions, Returning Objects, Object Assignment

(5 Hours)

Arrays, Pointers, References, and the Dynamic Allocation Operators: Arrays of Objects, Pointers to Objects, The this Pointer, Pointers to derived types, Pointers to class members. **Functions Overloading, Copy Constructors:** Functions Overloading, Overloading Constructor Functions. Copy Constructors, Default Function Arguments, Function Overloading and Ambiguity.

Module – 2

(6 Hours)

Module – 3

Operator Overloading: Creating a Member Operator Function, Operator Overloading Using a Friend Function, **Overloading new and delete Inheritance:** Base-Class Access Control, Inheritance and Protected Members, Inheriting Multiple Base Classes , Constructors, Destructors and Inheritance, Granting Access, Virtual Base Classes

(6 Hours)

Module – 4

Virtual Functions and Polymorphism: Virtual Functions, The Virtual Attribute is Inherited, Virtual Functions are Hierarchical, Pure Virtual Functions, Using Virtual Functions, Early vs Late Binding. **Templates**: Generic Functions, Applying Generic Functions, Generic Classes. The type name and export Keywords. The Power of Templates

(5 Hours)

Module – 5

Exception Handling: Exception Handling Fundamentals, Handling Derived-Class Exceptions, Exception Handling Options, Applying Exception Handling. **The C++ I/O System Basics:** C++ Streams, The C++ Classes, Formatted I/O File I/O: and File Classes, Opening and Closing a File, Reading and Writing Text Files, Detecting EOF,

(6 Hours)

Course Outcomes:

The students will be able to:

CO1: Illustrate the basic concepts of object-oriented programming.

CO2: Design appropriate classes for the given real world scenario.

CO3: Apply the knowledge of compile-time / run-time polymorphism to solve the given problem

CO4: Use the knowledge of inheritance for developing optimized solutions

CO5: Apply the concepts of templates and exception handling for the given problem

CO6: Use the concepts of input output streams for file operations.

Practical Component

| Sl. No | Experiments |
|--------|---|
| 1 | Develop a C++ program to find the largest of three numbers |
| 2 | Develop a C++ program to sort the elements in ascending and descending order. |
| 3 | Develop a C++ program using classes to display student name, roll number, marks |
| 4 | obtained in two subjects and total score of student Develop a C++ program for a bank empolyee to print name of the employee, account no. & balance. Print invalid balance if amount |
| 5 | Develop a C++ program to demonstrate function overloading for the following prototypes. add(int a, int b) add(double a, double b |
| 6 | Develop a C++ program using Operator Overloading for overloading Unary minus operator. |
| 7 | Develop a C++ program to implement Multiple inheritance for performing arithmetic operation of two numbers |
| 8 | Develop a C++ program using Constructor in Derived classes to initialize alpha, beta and gamma and display corresponding values. |
| 9 | Develop a C++ program to create a text file, check file created or not, if created it will write some text into the file and then read the text from the file. |
| 10 | Develop a C++ program to write and read time in/from binary file using fstream |
| 11 | Develop a function which throws a division by zero exception and catch it in catch block. |
| | Write a C++ program to demonstrate usage of try, catch and throw to handle exception |
| 12 | Develop a C++ program that handles array out of bounds exception using C++. |

Choice Based Credit System (CBCS)

SEMESTER – III

(Common to all branches)

Social Connect and Responsibility (Effective for 2022 Scheme)

| Course Code | BSCK307 | CIE Marks | 100 |
|-------------------------------|-------------|------------|-----|
| Teaching Hours/Week (L: T:P) | 0:0:2 | SEE Marks | - |
| Total Number of Contact Hours | 26 Hours | Exam Hours | - |
| Credits | 01 - Credit | | |

Course objectives: The course will enable the students to:

- 1. Provide a formal platform for students to communicate and connect to the surrounding.
- 2. create a responsible connection with the society.
- 3. Understand the community in general in which they work.
- 4. Identify the needs and problems of the community and involve them in problem –solving.
- 5. Develop among themselves a sense of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems.
- 6. Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes.

Social Connect & Responsibility -All Modules Activity Based Learning

Module-1

Plantation and adoption of a tree: Plantation of a tree that will be adopted for four years by a group of BE / B.Tech students. (ONE STUDENT ONE TREE) They will also make an excerpt either as a documentary or a photo blog describing the plant's origin, its usage in daily life, its appearance in folklore and literature - Objectives, Visit, case study, report, outcomes. **(04 Hours)**

Module-2

Heritage walk and crafts corner: Heritage tour, knowing the history and culture of the city, connecting to people around through their history, knowing the city and its craftsman, photo blog and documentary on evolution and practice of various craft forms - – Objectives, Visit, case study, report, outcomes. (05 Hours)

Module-3

Organic farming and waste management: Usefulness of organic farming, wet waste management in neighboring villages, and implementation in the campus – Objectives, Visit, case study, report, outcomes. (06 Hours)

Module-4

Water conservation: Knowing the present practices in the surrounding villages andimplementation in the campus, documentary or photoblog presenting the current practices –Objectives, Visit, case study, report, outcomes.(06 Hours)

Module-5

Food walk: City's culinary practices, food lore, and indigenous materials of the region used in cooking – Objectives, Visit, case study, report, outcomes. **(05 Hours)**

Course outcomes (Course Skill Set): At the end of the course, the student will be able to: CO1: Communicate and connect to the surrounding.

CO2: Create a responsible connection with society.

CO3: Involve in the community in general in which they work.

CO4: Notice the needs and problems of the community and involve them in problem –solving.

CO5: Develop among themselves a sense of social & civic responsibility & utilize their

knowledge in finding practical solutions to individual and community problems.

CO6: Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes.

ACTIVITIES: Jamming session, open mic, and poetry: Platform to connect to others. Share the stories with others. Share the experience of Social Connect. Exhibit the talent like playing instruments, singing, one-act play, art-painting, and fine art.

PEDAGOGY: The pedagogy will include interactive lectures, inspiring guest talks, field visits, social immersion, and a course project. Applying and synthesizing information from these sources to define the social problem to address and take up the solution as the course project, with your group. Social immersion with NGOs/social sections will be a key part of the course. Will all lead to the course project that will address the needs of the social sector?

COURSE TOPICS: The course will introduce social context and various players in the social space, and present approaches to discovering and understanding social needs. Social immersion and inspiring conversional will culminate in developing an actual, idea for problem-based intervention, based on an in-depth understanding of a key social problem

Duration: A total of 26 hours engagement per semester is required for the 3rd semester of the B.E./B.Tech. program. The students will be divided into groups. Each group will be handled by faculty mentor. Faculty mentor will design the activities (particularly Jamming sessions open mic, and poetry) Faculty mentors have to design the evaluation system as per VTU guidelines of scheme & syllabus.

Guideline for Assessment Process: Continuous Internal Evaluation (CIE): After completion of the course, the student shall prepare with daily diary as reference, a comprehensive report in consultation with the mentor/s to indicate what he has observed and learned in the social connect period. The report should be signed by the mentor. The report shall be evaluated on the basis of the following criteria and/or other relevant criteria pertaining to the activity completed. Marks allotted for the diary are out of 50. Planning and scheduling the social connect Information/Data collected during the social connect Analysis of the information/data and report writing Considering all above points allotting the marks as mentioned below

Excellent: 80 to 100 Good: 60 to 79 Satisfactory: 40 to 59 Unsatisfactory and fail: <39 Special Note: **NO Semester End Examination (SEE) – Completely Practical and activities-based evaluation**

Pedagogy – Guidelines: It may differ depending on local resources available for the study as well as environment and climatic differences, location and time of execution.

| Sl No | Tonic | Group size | Location | Activity execution | Reporting | Evaluation of the Topic |
|----------|--|--|---|---|---|--|
| 1. | Plantation and adoption of a tree | May be individual or team | Farmers land/ parks / Villages / roadside/ community area / College campus etc | Site selection /Proper consultation/ Continuous monitoring/ Information board | Report should be submitted by individual to the concerned evaluation authority | Evaluation as per the rubrics of scheme and syllabus by Faculty |
| 2. | Heritage walk and crafts corner | age andMay be individual or teamTemples / monumental placesSite selection /Proper consultation/Report shou be submitte by individual | | concerned evaluation | Evaluation as per the rubrics of scheme and syllabus by Faculty | |
| 3. | Organic farming and waste management | May be individual or team | Farmers land / parks / Villages visits / roadside/ community area / College campus etc | Group selection / proper consultation / Continuous monitoring / Information board | Report should be submitted by individual to the concerned evaluation authority | Evaluation as per the rubrics of scheme and syllabus by Faculty |
| 4. | Water conservation & conservation techniques | May be individual or team | Villages/ City Areas / Grama panchayat/ public associations/Gover nment Schemes officers / campus etc | site selection / proper consultation/ Continuous monitoring/ Information board | Report should be submittedEvaluation as per the rubrics of scheme and syllabus by evaluationReport should by individual to the concerned evaluationEvaluation scheme and syllabus by Faculty | |
| 5. | Food walk: Practices in society | May be individual or team | Villages/ City Areas / Grama panchayat/ public associations/Gover nment Schemes officers/ campus etc | Group selection / proper consultation / Continuous monitoring / Information board | Report should be submitted by individual to the concerned evaluation authority | Evaluation as per the rubrics of scheme and syllabus by Faculty |

Plan of Action (Execution of Activities)

| Sl.NO | Practice Session Description |
|-------|---|
| 1 | Lecture session in field to start activities |
| 2 | Students Presentation on Ideas |
| 3 | Commencement of activity and its progress |
| 4 | Execution of Activity |
| 5 | Execution of Activity |
| 6 | Execution of Activity |
| 7 | Execution of Activity |
| 8 | Case study-based Assessment, Individual performance |
| 9 | Sector/ Team wise study and its consolidation |
| 10 | Video based seminar for 10 minutes by each student At the end |
| | of semester with Report. |

 Υ Each student should do activities according to the scheme and syllabus.

- Y At the end of semester student performance has to be evaluated by the faculty for the assigned activity progress and its completion.
- Υ At last consolidated report of all activities from 1st to 5th, compiled report should be submitted as per the instructions and scheme.

Assessment Details for CIE (both CIE and SEE)

| Weightage | CIE – 100% | Y Implementation strategies of the | |
|---|------------|---|--|
| Field Visit, Plan, Discussion | 10 Marks | project (NSS work). | |
| Commencement of activities and its progress | 20 Marks | Y The last report should be signed by NSS Officer, the HOD and | |
| Case study-based Assessment Individual performance with report | 20 Marks | principal. Y At last report should be | |
| Sector wise study & its consolidation 5*5 = 25 | 25 Marks | evaluated by the NSS officer of the institute. | |
| Video based seminar for 10 minutes by each student at the end of semester with Report. Activities 1 to 5, 5*5 = 25 | 25 Marks | Y Finally, the consolidated marks sheet should be sent to the university and also to be made available at LIC visit. | |
| Fotal marks for the course in each semester | 100 Marks | | |
| For each activity, 20 marks CIE will be evaluated for IA marks at the end of semester, Report and assessment copy should be made available in the department. | | | |
| Students should present the progress of the activities as per the schedule in the prescribed practical session in the field. There should be positive progress in the vertical order for the benefit of society in general through activities. | | | |

| Data Analytics with R (0:0:2:0) 1 | | | | | | |
| (Effective from the academic year 2024-25) | | | | | | |
| Course Code | BCS358B | CIE Marks | 50 | | | |
| Teaching Hours/Week (L:T:P:S) | 0:0:2 | SEE Marks | 50 | | | |
| Total Number of Contact Hours | 25 | Exam Hours | 02 | | | |
| Examination Nature (SEE) Practical | | | | | | |

Course Objectives:

This course will enable students to:

- 1. To explore and understand how R and R Studio interactive environment.
- 2. To understand the different data Structures, data types in R.
- 3. To learn and practice programming techniques using R programming.
- 4. To import data into R from various data sources and generate visualizations.
- 5. To draw insights from datasets using data analytics techniques.

Preamble: R analytics is data analytics using R programming language, an open-source language used for statistical computing or graphics. This programming language is often used in statistical analysis and data mining It can be used for analytics to identify patterns and build practical models.

SI. **Experiments** No Demonstrate the steps for installation of R and R Studio. Perform the following: a) Assign different type of values to variables and display the type of variable. Assign different types such as Double, Integer, Logical, Complex and Character and understand the difference between each data type. b) Demonstrate Arithmetic and Logical Operations with simple examples. c) Demonstrate generation of sequences and creation of vectors. 1 d) Demonstrate Creation of Matrices e) Demonstrate the Creation of Matrices from Vectors using Binding Function. f) Demonstrate element extraction from vectors, matrices and arrays Suggested Reading - Text Book 1 - Chapter 1 (What is R, Installing R, Choosing an IDE - RStudio, How to Get Help in R, Installing Extra Related Software), Chapter 2 (Mathematical Operations and Vectors, Assigning Variables, Special Numbers, Logical Vectors), Chapter 3 (Classes, Different Types of Numbers, Other Common Classes, Checking and Changing Classes, Examining Variables)

| | Assess the Financial Statement of an Organization being supplied with 2 vectors of data: Monthly Revenue and Monthly Expenses for the Financial Year. You can create your own sample data vector for |
|---|---|
| | this experiment) Calculate the following financial metrics: |
| | a. Profit for each month. |
| | b. Profit after tax for each month (Tax Rate is 30%). |
| | c. Profit margin for each month equals to profit after tax divided by revenue. |
| | d. Good Months – where the profit after tax was greater than the mean for the year. |
| | e. Bad Months – where the profit after tax was less than the mean for the year. |
| | f. The best month – where the profit after tax was max for the year. |
| 2 | g. The worst month – where the profit after tax was min for the year. |
| | Note: |
| | a. All Results need to be presented as vectors |
| | b. Results for Dollar values need to be calculated with \$0.01 precision, but need to be presented in Units |
| | of \$1000 (i.e 1k) with no decimal points |
| | c. Results for the profit margin ratio need to be presented in units of % with no decimal point. |
| | d. It is okay for tax to be negative for any given month (deferred tax asset) |
| | e. Generate CSV file for the data. |
| | Suggested Reading – Text Book 1 – Chapter 4 (Vectors, Combining Matrices) |
| 3 | Develop a program to create two 3 X 3 matrices A and B and perform the following operations a) Transpose of the matrix b) addition c) subtraction d) multiplication |
| | Suggested Reading – Text Book 1 – Chapter 4 (Matrices and Arrays – Array Arithmetic) |
| | Develop a program to find the factorial of given number using recursive function calls. |
| 4 | Suggested Reading – Reference Book 1 – Chapter 5 (5.5 – Recursive Programming) |
| | Text Book 1 – Chapter 8 (Flow Control and Loops – If and Else, Vectorized If, while loops, for |
| | loops), Chapter 6 (Creating and Calling Functions, Passing Functions to and from other functions) |
| | Develop an R Program using functions to find all the prime numbers up to a specified number by |
| 5 | the method of Sieve of Eratosthenes. Suggested Reading – Reference Book 1 - Chapter 5 (5.5 – Recursive Programming) |
| 5 | Text Book 1 – Chapter 8 (Flow Control and Loops – If and Else, Vectorized If, while loops, for loops), |
| | Chapter 6 (Creating and Calling Functions, Passing Functions to and from other functions) |
| | The built-in data set mammals contain data on body weight versus brain weight. Develop R commands |
| | to: |
| | a) Find the Pearson and Spearman correlation coefficients. Are they similar? |
| 6 | b) Plot the data using the plot command. |
| | c) Plot the logarithm (log) of each variable and see if that makes a difference. |
| | Suggested Reading – Text Book 1 – Chapter 12 – (Built-in Datasets) Chapter 14 – (Scatterplots) |
| | Reference Book 2 – 13.2.5 (Covariance and Correlation) |

Using the built in dataset mtcars which is a popular dataset consisting of the design and fuel consumption patterns of 32 different automobiles. The data was extracted from the 1974 Motor Trend US magazine, and comprises fuel consumption and 10 aspects of automobile design and performance for 32 automobiles (1973-74 models). Format A data frame with 32 observations on 11 variables : [1] mpg Miles/(US) gallon, [2] cyl Number of cylinders [3] disp Displacement (cu.in.), [4] hp Gross horsepower [5] drat Rear axleratio,[6] wt Weight (lb/1000) [7] qsec 1/4 mile time, [8] vs V/S, [9] am Transmission (0 = automatic, 1 = manual), [10] gear Number of forward gears, [11] carb Number of carburetors Develop R program, to solve the following:

a) What is the total number of observations and variables in the dataset?

b) Find the car with the largest hp and the least hp using suitable functions
c) Plot histogram / density for each variable and determine whether continuous variables are normally distributed or not. If not, what is their skewness?

d) What is the average difference of gross horse power(hp) between automobiles with 3 and 4 number of cylinders(cyl)? Also determine the difference in their standard deviations.

e) Which pair of variables has the highest Pearson correlation?

Demonstrate the progression of salary with years of experience using a suitable data set (You can create your own dataset). Plot the graph visualizing the best fit line on the plot of the given data points. Plot a curve of Actual Values vs. Predicted values to show their correlation and performance of the model. Interpret the meaning of the slope and y-intercept of the line with respect to the given data. Implement

11 using lm function. Save the graphs and coefficients in files. Attach the predicted values of salaries as a new column to the original data set and save the data as a new CSV file.

Suggested Reading – Reference Book 2 – Chapter 20 (General Concepts, Statistical Inference, Prediction)

Course outcomes:

The students will be able to:

- CO1: Explain the fundamental syntax of R data types, expressions and the usage of the R-Studio IDE.
- CO2: Develop a program in R with programming constructs: conditionals, looping and functions.
- CO3: Apply the list and data frame structure of the R programming language.
- CO4: Use visualization packages and file handlers for data analysis.

Choice Based Credit System (CBCS)

SEMESTER – III

VERSION CONTROLLER WITH GIT (0:0:2:0) 1

(Effective from the academic year 2024-25)

| Course Code | BCS358C | CIE Marks | 50 |
|-------------------------------|-----------|------------|----|
| Teaching Hours/Week (L:T:P:S) | 0:0:2:0 | SEE Marks | 50 |
| Total Number of Contact Hours | 26 | Exam Hours | 02 |
| Examination Nature | Practical | | |

Course Objectives:

This course will enable students to:

- 1. Familiar with the basic command of Git.
- 2. Create and manage branches.
- 3. Understand how to collaborate and work with Remote Repositories.
- 4. Familiar with version controlling commands.

Preamble

In today's fast-paced world of software development and project management, the ability to efficiently manage your project's source code and collaborate with team members is crucial. Git has become the industry standard for version control, enabling seamless project tracking, code collaboration, and problem resolution.

| SI. No | Experiments |
|-----------|---|
| 1 | Setting Up and Basic Commands |
| | Initialize a new Git repository in a directory. Create a new file and add it to the staging |
| | area and commit the changes with an appropriate commit message. |
| 2 | Creating and Managing Branches |
| | Create a new branch named "feature-branch." Switch to the "master" branch. Merge the "feature- |
| | branch" into "master." |
| 3 | Creating and Managing Branches |
| | Write the commands to stash your changes, switch branches, and then apply the stashed changes. |
| 4 | Collaboration and Remote Repositories |
| | Clone a remote Git repository to your local machine. |
| 5 | Collaboration and Remote Repositories |
| | Fetch the latest changes from a remote repository and rebase your local branch onto the |
| | updated remote branch. |
| 6 | Collaboration and Remote Repositories |
| | Write the command to merge "feature-branch" into "master" while providing a |
| | custom commit message for the merge. |
| 7 | Git Tags and Releases |
| | Write the command to create a lightweight Git tag named "v1.0" for a commit in your local repository. |
| 8 | Advanced Git Operations |
| 9 | Write the command to cherry-pick a range of commits from "source-branch" to the current branch. |
| 9 | Analysing and Changing Git History |
| | Given a commit ID, how would you use Git to view the details of that specific commit, including |
| 10 | the author, date, and commit message? |
| 10 | Analysing and Changing Git History |
| | Write the command to list all commits made by the author "JohnDoe" between "2023-01-01" and "2023-12-31." |
| | allu 2023-12-31. |

Analysing and Changing Git History
 Write the command to display the last five commits in the repository's history.

 Analysing and Changing Git History
 Write the command to undo the changes introduced by the commit with the ID "abc123".

Course outcomes:

The students will be able to:

CO1: Use the basics commands related to Git repository

CO2: Create and manage the branches

CO3: Apply commands related to Collaboration and Remote Repositories

CO4: Use the commands related to Git Tags, Releases and advanced Git operations

CO5: Analyze and change the Git history

Course objectives:

- CLO 1. Demonstrate the use of IDLE or PyCharm IDE to create Python Applications
- CLO 2. Using Python programming language to develop programs for solving real-world problems
- CLO 3. Implementation of Matplotlib for drawing different Plots
- CLO 4. Demonstrate working with Seaborn, Bokeh.

Preamble:

Data Visualization with Python course i a gateway to the captivating world of visualizing data using the power of Python. In this journey, you'll uncover the art and science of transforming raw data into meaningful and engaging visual representations. Throughout this course, we will equip you with the skills and knowledge to create informative, insightful, and aesthetically pleasing data visualizations. Whether you're a data scientist, analyst, or enthusiast, the ability to present data effectively is a valuable skill.

| Sl. No | Experiments | | |
|--------|---|--|--|
| 1. | a) Write a python program to find the best of two test average marks out of three | | |
| | test's marks accepted from the user. | | |
| | b) Develop a Python program to check whether a given number is palindrome or not | | |
| | andalso count the number of occurrences of each digit in the input number. | | |
| | Datatypes: https://www.youtube.com/watch?v=gCCVsvgR2KU | | |

Department of Humanities and Social Sciences B.E. INFORMATION SCIENCE AND ENGINEERING Choice Based Credit System (CBCS) SEMESTER - III to VI NSS (Common to all branches) (Effective for the 2022 scheme) **Course Code** BNSK359/459/559/659 **CIE Marks** 100 Teaching Hours/Week (L:T:P) 0:0:2 **SEE Marks** Total Number of Contact Hours 26 Exam Hours Mandatory Course (Non-Credit) (Completion of the course shall be mandatory for the award of degree) **Course Objectives: National Service Scheme (NSS) will enable the students to:** 1. Understand the community in general in which they work. 2. Identify the needs and problems of the community and involve them in problem solving. 3. Develop among themselves a sense of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems. 4. Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes. 5. Develop capacity to meet emergencies and natural disasters & practice national integration and social harmony in general. Module - 1 Introduction to NSS History and growth of NSS, Philosophy of NSS, Objectives of NSS, Meaning of NSS Logo, NSS Programs and activities, administrative structure of NSS, Planning of programs / activities, implementation of NSS programs / activities, National & State Awards for NSS College / Program Officer / Volunteers. (04 Hours) Module - 2 **Overview of NSS Programs** Objectives, special camping – Environment enrichment and conservation, Health, Family, Welfare and Nutrition program. Awareness for improvement of the status of women, Social Service program, production-oriented programs, Relief & Rehabilitation work during natural calamities, education and recreations, Selection of the problem to be addressed. (04 Hours) Module - 3 NSS Activities - Group Contributions to Society / community (Activity based Learning) Organic Farming, Indian agriculture (Past, Present, Future) Connectivity for marketing, Waste management- Public, Private and Govt. organization, 5 R's. Water conservation techniques - role of different stakeholders - implementation, preparing an actionable business proposal for enhancing the village income and approach for implementation. Helping local schools to achieve good results and enhance their enrolment in Higher/technical/vocational education. (06 Hours) Module - 4 National Level Activities for Society / Community at large (Activity based Learning) Developing Sustainable Water management system for rural areas and implementation approaches. Contribution to any national level initiative of Government of India. Foreg. Digital India, Skill India, Swachh Bharat, Atmanirbhar Bharath, Make in India, Mudra scheme, Skill development programs etc.

(06 Hours)

Module – 5

Individual Activities for Local Voice (Activity based learning)

Govt. school Rejuvenation and helping them to achieve good infrastructure, Plantation and adoption of plants. Know your plants. Spreading public awareness under rural outreach programs, National integration and social harmony events. (06 Hours)

Course outcomes (Course Skill Set):

At the end of the course, the student will be able to:

CO1: Understand the importance of his / her responsibilities towards society.

CO2: Analyse the environmental and societal problems/issues and will be able to design solutions for the same.

CO3: Evaluate the existing system and to propose practical solutions for the same for sustainable development.

CO4: Implement government or self-driven projects effectively in the field.

CO5: Develop capacity to meet emergencies and natural disasters & practice national integration and social harmony in general.

Teaching Practice:

Course outcomes:

The students will be able to:

- 1. Understand the importance of sports and games, inculcate healthy habits of daily exercise & fitness, Self-hygiene, good food habits, Create awareness of Self-assessment of fitness.
- 2. Develops individual and group techno tactical abilities of the game.
- 3. Increases the team combination and plan the strategies to play against opponents.
- 4. Outline the concept of sports training and how to adopt technology to attain high level performance.
- 5. Summarize the basic principles of organising sports events and concept of technology implemented to organise competitions in an unbiased manner.

Teaching Practice:

- Υ Classroom teaching (Chalk and Talk)
- Υ ICT Power Point Presentation and video analysing.
- Υ Practical classes in outdoor and indoor as per requirement.

CIE: 100 Marks

- Υ CIE 1 for 40 marks A theory paper which is MCQ / Descriptive conducted during the semester.
- Υ CIE 2 for 60 marks A practical test conducted at the end of the semester in which the student has to give fitness and skill tests and his performance in game will be assessed.
