About the Event:

Silicon Synergy 2025 was a significant industry-academia conclave hosted by the BMS Institute of Technology and Management (BMSIT&M) in Yelahanka, Bengaluru, on April 24, 2025. Organized by the PRIME Club of BMSIT&M, the event aimed to foster collaboration between academia and industry in the fields of semiconductors, embedded systems, and emerging technologies.

The event facilitated knowledge exchange, networking, and discussions on innovation and entrepreneurship, aligning with BMSIT&M's commitment to fostering engineering excellence.

Objectives of the Event:

1. Bridge the Industry-Academia Gap:

Foster collaboration between academic institutions and the **semiconductor /embedded** systems industries to align educational outcomes with real-world applications.

2. Promote Innovation & Research:

Encourage students and faculty to engage in research, innovation, and development in VLSI, embedded systems, and semiconductor technologies.

3. Enable Knowledge Exchange:

Provide a platform for thought leaders, industry experts, and academicians to share insights on the latest trends, challenges, and opportunities in the tech ecosystem.

4. Enhance Skill Development:

Equip students with industry-relevant knowledge and soft skills through exposure to panel discussions, expert talks, and networking sessions.

5. Foster Entrepreneurship & Startups:

Motivate young engineers to explore entrepreneurial ventures and understand the startup landscape in electronics and embedded domains.

6. Encourage Campus-Industry Connect:

Build strategic partnerships for internships, placements, and collaborative projects between BMSIT&M and leading tech companies.

7. Inspire Future Engineers:

Instill a spirit of curiosity, innovation, and lifelong learning among students to shape them into competent professionals.

Speakers & Panelists:

Chandrashekhar B U	Synopsys Inc.
Sivaram allamaraju	Cadence
Prashanth khanadale	Microchip
Nikhil R Rao	Vagmin research labs
Rahul iyer	Samsung semiconductors
Vijay mukuthamath	Sensesemi Technologies
Augustus azariah	IBM
Vijay guddi	Semi-ksha semiconductors
Chella pandian	Biocon
Cyril Prasanna Raj P	Cambridge institute of technology
Ravindra kulkarni	Trivik Technologies
Vishal J Rathod	C-DAC bangalore
Praveen chikkaveeraiah	LG india
Dr. Prabhakar Mishra	Vagmin research labs
Gururaj K B	Comofi medtech
Mallikarjun Bande	NXP semiconductors
Ajay Krishnakutty	Siemens Healthineers
Srinath Gururajrao	Simple Energy
Vijay Arcot	Sequoia
Suraj Chettri	Airbus india

Event Highlights:

Panel 1: The Semiconductor Renaissance

This panel focused on the resurgence of the semiconductor industry, exploring how global advancements in technology are propelling innovations in semiconductors. Industry experts discussed the critical role that semiconductors play in emerging technologies such as Artificial Intelligence, 5G, automotive electronics, and more. The conversation highlighted how India, in particular, can strengthen its position in the global semiconductor market by improving R&D, fostering industry-academia collaboration, and developing a skilled workforce to meet future demands.

Panel 2: Campus Connect: Industry-Academia Partnership

The "Campus Connect" panel emphasized building strong bridges between academic institutions and the tech industry. Key discussions centered around updating engineering curricula to keep pace with rapidly changing technological landscapes. Panelists shared best practices for creating symbiotic relationships between universities and industries, such as offering internships, research collaborations, and hands-on projects. The session aimed to help students gain practical exposure and ensure that they are industry-ready upon graduation.

Panel 3: The Future of Embedded Systems

The "Future of Embedded Systems" panel explored the pivotal role embedded systems play in various industries, particularly in areas such as IoT, automotive, healthcare, and industrial automation. Experts shared insights into how embedded technologies are evolving, especially with the rise of smart devices and connected systems. The discussion highlighted the potential for embedded systems to drive major technological advancements and transform industries by making them more efficient, intelligent, and sustainable.

Panel 4: From Breadboard to Design Desk

This session provided an in-depth look into the journey of taking an idea from a physical prototype (breadboard) to a fully developed and manufactured product. Industry leaders and experts discussed the challenges of the product development lifecycle, from design and simulation to validation and testing. The panel also touched on design thinking, ensuring that students and professionals gain an understanding of how conceptual designs evolve into practical, market-ready solutions. This discussion was invaluable for anyone looking to understand the real-world application of hardware design and product prototyping.

BMS Institute of Technology and Management conducted "Silicon Synergy 2025" a Semiconductor Industry Conclave and Expo

Silicon Synergy is a premier semiconductor industry conclave and expo organised in association with Bureau of Indian Standards(BIS).

Event aims to foster collaboration between Academia and Semiconductor Industry. Part of the event was: Keynote address by Dr. Satya Gupta, 4 Technical Panels with 20+ experts and Industrial Product Exhibitions. This event is a gateway to the staff and students to get an insight on industry trends, exposure and R&D collaborations. During the inauguration of the event the Chief Guest Dr. Satya Gupta, Founder of IESA, EPIC Foundation, and President of VLSI Society of India, Mr. Sivaram Allamaraju, Design Group Director, Cadence and, Mr. Chandrashekar B U, Senior Architect, Synopsys, Principal Dr. Sanjay H A, Vice Principal Dr. Anil G N, Event coordinator Dr.Raju Hajare, Dr.Manjunath T N, Dean Career Guidance and student coordinators were present. The Chief Guest, Dr. Satyagupta, delivered a thought-provoking Keynote Address, emphasizing the need for academic institutions to continuously evolve and align with industry trends. Principal, Dr. Sanjay H A spoke about the institution's mission to create not just engineers, but visionaries – equipped with the skills, mindset, and confidence to make a difference in society. The panel focused on India's growing footprint in the global semiconductor industry. Experts discussed how innovation, policy support, and talent development are aligning to make India a major semiconductor hub. The heart of Silicon Synergy 2025 lay in its vibrant exhibition arena, featuring a diverse and dynamic range of industry, academic, and experiential stalls. Attendees engaged with experts, explored job and internship opportunities, and experienced real-world applications of electronics and embedded systems. These stalls showcased breakthroughs in semiconductors, embedded systems, AI, power electronics, and next-gen solutions.

BMSITM Bridges Academia and Industry in Semicon Conclave

From Left to Right: Ananth Mallya, Chief Advisor, Strategic Industry Liaison, BMSIT&M; Dr.Raju Hajare, Professor, ECE, BMSIT&M; Dr. Sanjay H A, Principal, BMSIT&M; Sivaram Allamaraju, Design Group Director, Cadence; Dr Satya Gupta, Corporate- Intel President, VLSI Society of India (Sitting); Chandrashekar B U, Senior Architect, Synopsys Inc; Dr Anil G N, Vice - Principal, BMSIT&M; Dr. Manjunath T N, Dean, Career Guidance, BMSIT&M; and Saichandan Anagani, student, ECE, BMSIT&M

BMS Institute of Technology and Management recently hosted "Silicon Synergy 2025," a premier Semiconductor Industry Conclave and Expo held in association with the Bureau of Indian Standards (BIS).

The event aimed to strengthen collaboration between academia and the semiconductor industry. Highlights included a keynote address by Dr. Satya Gupta, four expert-led technical panels featuring 20+ industry leaders, and an industrial product exhibition.

Silicon Synergy served as a valuable platform for students and faculty to gain insights into emerging industry trends, explore R&D opportunities, and connect with key stakeholders in the semiconductor ecosystem.
