Information on Industry Connect for Website

Industry Institute interactions/partnerships:

i) Memorandum of Understanding (MOU)

On January 7, 2025, BMSIT&M entered into a Memorandum of Understanding (MoU) with Vagmin Research Labs LLP to establish a Centre for VLSI Systems and Design. The MoU aims to foster research, innovation, training, and knowledge sharing in the domain of VLSI. As part of this collaboration, both institutions will engage in joint research and development, conduct workshops, seminars, and training programs, and create educational and technical resources. The initiative also seeks to enhance the skills of students, faculty, and researchers, support entrepreneurship and innovation through mentorship, offer technical and research support, and enable access to specialized tools, technologies, and funding opportunities for R&D activities.

ii) **Industry Conclave-SILICON SYNERGY-2025**

A technology conclave was jointly organized by the Departments of ECE and EEE at BMSIT&M on April 24, 2025, bringing together industry leaders, academia, and aspiring engineers. The event featured a high-level panel discussion on emerging trends in VLSI design and embedded applications, with expert insights from top professionals in the field. A premier electronics expo was also held, offering a platform for major hardware companies to showcase their latest products and technologies through dedicated industry stalls. The event attracted over 600 students, who gained valuable exposure to current industry practices, evolving technologies, and essential skillsets expected by employers in the electronics domain.

iii) Industry-Academia Meet-2024

The Department of Electronics and Communication Engineering at BMS Institute of Technology and Management (BMSIT&M), Yelahanka, hosted the highly anticipated **“Industry-Academia Meet-24”** on **7th December 2024**. The event focused on fostering collaboration between academia and industry. This unique initiative brought together industry professionals, academic experts, and researchers to discuss advancements in VLSI technology and their implications for higher education. The goal was to bridge the gap between academic curriculum and real-world applications, equipping students with cutting-edge skills and knowledge. The event Industry academia meet-2024 played a pivotal role in organizing this successful meet, ensuring fruitful discussions and actionable outcomes. The Industry leaders from Synopsys, Intel, Cadence, SanDisk and L&T etc. Dr. Prabhakar Mishra Professor of Practice at BMSIT&M, along with Mr. Nikhil Rao from Vagmin Research Labs extended support in organizing this event successfully. The event concluded with a roadmap for integrating industry feedback into the curriculum, aiming to make the M.Tech VLSI program at BMSIT&M a benchmark in academic excellence and industry relevance.

iv) Skill Enhancement Program on VLSI and High-Performance Embedded Computing:

The Department of ECE organized a Skill Enhancement Program on "VLSI and High-Performance Embedded Computing" for students of 5th semester ECE, ETE, and EEE. The program aimed to strengthen students' competencies in core technical areas, providing them with industry-relevant knowledge and hands-on exposure. The sessions were led by Dr. Prabhakar Misra, CEO of Vagmin Research Labs and Professor of Practice in the ECE Department, bringing valuable industry insights to the classroom. Conducted over a span of 24 hours, the program ran from December 6, 2024, to January 24, 2025, with sessions held on Friday and Saturday afternoons. This program enabled students to gain a deeper understanding of advanced concepts in VLSI architecture and embedded system design.

v) Industry-driven course on RISC-V

An industry-oriented training program on RISC-V Architecture was organized for 4th-semester ECE students in partnership with Angstromers, running from April 4 to May 31, 2025, on alternate Fridays and Saturdays. The course offered a comprehensive 100-hour curriculum, including 60 hours of in-person sessions and 40 hours conducted online. A total of 31 students enrolled in the program, which aimed to strengthen their technical proficiency and align their learning with current industry standards.

Sl. No.	List of industry supported laboratories	Name of the Industry	Description
1	Advanced DSP Lab	Pathpartner Technologies	Provided a funding of Rs.3.4 Lakhs to set up advanced DSP lab facilities
2	Intel FPGA Lab	Intel Technology India Pvt Ltd	Provided an FPGA hardware worth rupees 2,04,930/- and software worth rupees 33,69,375/- with 15 licensed software received free of cost for Academia purpose.
3.	QNX software lab	Pi square Technologies	Set up a software lab to train the students on QNX operating system.

PathPartner Technology (Member of KPIT Group) Funded Signal Processing and IoT Project Lab at BMS Institute of Technology and Management.

BMS Institute of Technology C Management (BMSITCM) expresses our sincere gratitude to our esteemed industry partner, PathPartner Technology (Member of KPIT Group) for setting up a state of the art facility at BMSITCM by generous funding a grant of Rs.340000 from their CSR fund. This support has empowered BMSITCM to equip our state-of-the-art Signal Processing and IoT Project Lab hence provide our undergraduate engineering students a hands-on experience that utilizes the latest technologies for innovation and project development.

Yelahanka, Bengaluru -560119

Photograph of various development boards and equipment procured from the funds provided by PathPartner Technologies for the Signal Processing and IoT Project Lab

The Signal Processing and IoT Project Lab empowers our students to take their learning beyond the classroom. Undergraduates of all semesters are actively engaged in the lab, developing projects that tackle real-world problems using signal processing, sensor networks, and the power of the Internet of Things. This facility helped more than 60 students from various semesters of ECE branch to execute various projects during their project-based learning. The students developed array of projects such as SafeQuest, Robotic Aerial and Planetary Terrain Operational Rover, i-Trasher, Agrover etc.

The partnership with PathPartner Technologies is instrumental in providing our students with the resources and exposure needed to excel in today's technology-driven world. The strong commitment from the officials from PathPartner Technologies in our industry attached course on “Digital Signal Processing” helped several students from ECE, ETE and EEE branches at BMSIT, to understand and apply various industrial level applications of signal processing such as Audio Signal Processing, Video Signal Processing, Image Processing and Radar Signal Processing.

Officials from PathPartner Technologies interacting with students at BMSITM

This collaboration allowed our students to execute industry-relevant project ideas, and acted as potential pathways to their future careers.

Industry internship process:

Industry internships are structured opportunities that allow students to gain practical exposure to real-world engineering environments. These internships enable students to apply theoretical knowledge to live projects, understand industrial workflows, and interact with professionals, thereby enhancing their technical and professional competencies. As per the academic scheme, the number of credits allotted for industry internships is:

- **2021 Scheme:** 12 credits
- **2022 Scheme:** 10 credits

Process Followed for Industry Internship in the Department

The department follows a systematic process to ensure students gain meaningful industry exposure and are guided effectively by faculty mentors. The process includes the following stages:

1. Planning and Awareness

- The department briefs students on the importance, objectives, expected outcomes, duration, scheme, and credit structure of industry internships.
- Internship guidelines, timelines, and evaluation criteria are shared with students through circulars and mentoring sessions.

2. Identification of Internship Opportunities

- Students identify suitable companies/organizations for internships based on their area of interest.

The department also facilitates opportunities through:

- Faculty, alumni and industry network
- Training and Placement Cell (T&P Cell)

3. Approval Process

- Students submit internship proposals including company details and proposed duration.

ಬಿ.ಎಂ.ಎಸ್. ತಾಂತ್ರಿಕ ಮತ್ತು ವ್ಯವಸ್ಥಾಪನಾ ಮಹಾವಿದ್ಯಾಲಯ

BMS INSTITUTE OF TECHNOLOGY & MANAGEMENT

(Autonomous Institution Under VTU)

Yelahanka, Bengaluru -560119

- The Internship Coordinator verifies and approves the internship to ensure alignment with academic objectives and relevance to the discipline.

4. Internship Execution

- Internships are typically undertaken during the summer break after the 4th or 6th semester.
- Students maintain an internship diary to document tasks, learnings, and reflections.
- Regular interaction with the assigned faculty mentor is ensured via email or periodic updates.

5. Monitoring and Mentoring

- Faculty mentors monitor student progress and provide guidance on technical and ethical aspects.
Feedback is taken from industry supervisors for performance review.

6. Evaluation and Documentation

- On completion, students submit:
 - Internship Report
 - Completion Certificate from the organization
 - Supervisor feedback (if available)
- Evaluation is carried out through:
 - Viva-voce or presentation
 - Review of report
 - Rubric-based assessment covering learning outcomes
