Suggestions from students:

1. What I expect from an Open course is something not related to the regular academic syllabus. For example 'Basics of Animation', 'Fundamentals of business', etc. These are the kind of courses that we want to learn, but cannot join to separate classes as we don't have any extra time. Over all it was good. Thank you.
2. It should be between semester, not in the end.
3. One week is not enough to grasp the whole concepts of open course. Kindly increase the period of course in future courses. Overall it was a nice experience to gain some knowledge during these lockdown period

Total open courses offered by college: 28

Highest registration course at college level: 71 (5 G technology and Image Processing with MATLAB/PYTHON & its application)
