Date	16/12/2023
Time	6.00PM-7:30PM
Name of the Activity	Interaction with Alumni
Name of the Coordinator	Mr. Gaurav Saraff
No of Students attended	45
About the activity	<p>Access Denied, BMSIT&M hosted an event titled "Adding Context to Threat Intelligence using Generative AI" on December 16th, 2023. In our "Adding Context to Threat Intelligence using Generative AI", participants gained a comprehensive understanding of the synergy between Generative AI, Large language models (LLMs) and threat intelligence. The session explored how LLMs contributed to advanced threat detection by analysing and processing extensive data.</p> <p>Topics included practical applications of LLMs in parsing security texts, monitoring online sources for emerging threats, and enhancing incident response. The webinar also addressed the legal and ethical considerations associated with integrating LLMs into cyber security strategies.</p> <p>Attendees equipped themselves with insights into the tools and methodologies for effective LLM utilization in threat intelligence workflows. The event provided an opportunity for participants to stay at the forefront of cyber security with the transformative power of Large Language Models</p> <p>Objectives of the event</p>
