# A GAME CHANGER AND CREATOR SINCE 11

● Parvathi Ajith

**A**s a toddler, Agneya Koushik was introduced to the world of gaming by his father. "Seeing him play games, I used to do the same even though I had no clue what I was doing," he recalls.

After his first encounter with video games through Road Rash (1991), there was no turning back. He would play any game he could get his hands on. His passion for gaming grew and he created a game when he was 11. "I didn't give it a name but I guess we could call it Army Man. The game was in basic 2D, and had characters shooting people who weren't moving," he says.

Agneya went on to make a dozen more games that were endless running game like Temple Run (2011). "I made a game called Leo's Nightmare, where Leonardo Di

Caprio runs behind the Oscar unable to get it due to obstacles," he laughs. He obviously made it before the actor did win the Oscar last year!

But none of his games were published as they were alpha version with a lot of bugs in them. He felt they were unimpressive. "They weren't really of publishing quality. I'd make them as pet projects to explore what I was capable of." While testing waters with game designing, Agneya came across gaming competitions in 2012. "Though I lost, I saw new dimensions of the gaming world." Since then he has taken part in various competitions and has won prizes in most of them using the name Marzil. "The name Marzil was inspired from the name of an evil pirate in One Piece, a manga series by Marshall D Teach," he says.

Over a span of three years he was a part of various gaming teams but for past three months, he has been part of a team called TradeMarc Gaming. Agneya's most cherished tournament is Extremsland Zowie Asia CS:GO 2016 that happened in September 2016 at Shanghai. "There was a tournament in August; winners from that tournament could participate in Extremsland Zowie Asia CS:GO. Our hard work paid off and we got the chance to participate," he says. The team lost in the qualifiers round, but he loved and met a lot of like-minded people.
