

BMS INSTITUTE OF TECHNOLOGY & MANAGEMENT

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

A BRIEF REPORT ON ALUMNI TALK: JAVA WALK-THROUGH

SPEAKER: MR.SREELOLA HEGDE AND MS SWATHI.S(ALUMNI OF 2014 & 2016 BATCH)

DevOps Engineer at Zynga Game Network India Pvt.Ltd Bengaluru

ASSOCIATE SOFTWARE ENGINEER CGI,BENGALURU

AUDIENCE: IV SEMESTER CSE

Following topics were discussed :

- It was a short session which was purely based on Object Oriented Programming. As the speakers started with fundamentals of java, they taught us about object and classes with the real time examples.
- Further they spoke about the Java buzzwords like secure, portable, object-oriented, robustness and many more and explained in depth the each buzzword which made Java popular with real time examples.
- General format of writing a Java program and the various packages that has to be imported to make a system efficient. Also taught about concepts of multithreading and their applications. We also acquired some knowledge on Java applets, Swing applications and Generics. It was crucial for students to understand the Java principles, versions, implementations, performance, syntax and many more, which was clarified in this session.
- Insight on job recruiting process was also given. They gave a lot of guidelines and tricks on how to prepare for interviews and suggested a lot of websites through which we could learn.
- The session was a tailored in a good way. Course flow was well designed by the speakers. On the whole it was a very informative session and a great help for the students. We hope to have many more such sessions in the coming future.
- Brief idea about scrum meetings and some tools that come in handy to keep track of our progress in development.
